Parts

- modular tall table top 1x

Base unit sold seperately

- modular tall bookcase 2x
1. Lay top upside down on a soft surface to protect finish. Attach metal bracket (A) to table top by aligning predrilled holes on metal bracket to pre-drilled holes in under top frame. Run 3 screws (B) to hold each bracket to under top frame.

2. Position 2 tall bookcases to make sure the distance between them match the distance between the 2 assembled metal brackets under top. Carefully flip the top right side up with a helper. Then lift on 2 bookcases as shown below. Run 3 screws (B) on each bracket through pre-drilled holes in brackets with Philips head screw driver to hold metal brackets to bookcase.

CARE INSTRUCTIONS
Hardware may loosen over time. Periodically check that all connections are tight. Wipe with a soft, dry cloth. To protect finish, avoid the use of chemicals and household cleaners.
