CAUTION:

- BEFORE INSTALLING FIXTURE, MAKE SURE THE POWER TO THE CIRCUIT IS TURNED OFF AT THE MAIN FUSE BOX / CIRCUIT BREAKER UTILITY BOX.

Important Safety Instructions:

- These instructions are provided for your safety. It is very important that they are read carefully and completely before beginning the assembly and installation of this lighting fixture.

- We strongly recommend that a professional electrician install all direct wire fixtures.

- THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODES BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED.

- The lighting fixture is meant for indoor use. It must be connected only to 3-wire, single-phase electrical supply systems (provided with Ground wire or equivalent protection system).

- For your safety, it is strongly recommended that two people install the lighting fixture.

- This fixture has been rated for up to one (1) 40-watt maximum TYPE G standard (candelabra) incandescent light bulb (not included) or one (1) 9-watt compact fluorescent light bulb (not included). To avoid the risk of fire, do not exceed the recommended wattage.

- The lighting fixture is meant for indoor use, SUITABLE FOR EITHER DRY OR DAMP LOCATIONS.

- This lighting fixture can be installed onto the wall or the ceiling.

- Save these instructions.

WARNING:

- To reduce the risk of fire, electrical shock or personal injury, always turn off light fixture and allow it to cool prior to replacing light bulb.

- Do not touch bulb when fixture is turned on. Do not look directly at lit bulb.

- Keep flammable materials away from lit bulb.

- This lighting fixture contains lead, a chemical known to the State of California to cause cancer, birth defects and other reproductive harm. Wash hands after installing, handling, cleaning or otherwise touching this light fixture.

Pre-assembly:

- Remove all parts and hardware from box along with any plastic protective packaging.

- Do not discard any contents until after assembly is complete to avoid accidentally discarding small parts or hardware.

- For your safety and convenience, assembly by two people is recommended.
Tools Required: (not included):

- Phillips Head, Flat Blade Screwdrivers
- Electrical tape
- Wire Cutter/Stripper
- Pliers

Parts Included:
- (B) Mounting Plate (1)
- (C) Green Ground Screw (1)
- (D) Threaded Rods (2)
- (F) Canopy (1)
- (G) Knurled Nuts (2)
- (H) Glass Shade (1)
- (I) Socket (1)

Hardware Enclosed:
- (A) Plastic Wire Nut Connectors (3)
- (E) Mounting Screws (3) (includes (1) extra)
Assembly Instructions:

- SHUT OFF THE MAIN ELECTRICAL SUPPLY FROM THE MAIN FUSE BOX/CIRCUIT BREAKER.
- Carefully unpack all fixture parts and hardware and lay them on a clear workspace.

Separate the Mounting Plate (B) from the Canopy (F) by removing the 2 Knurled Nuts (G).

1. Insert the J-box wires through the center opening of the Mounting Plate (B)
2. Attach the Mounting Plate (B) onto the wall J-box
3. Secure the Mounting Plate (B) by turning the 2 Mounting Screws (E) until tight

Please read the section "To Make the Wire Connections" Below.
1. Position the Canopy (F) over the Mounting Plate (B), making sure the 2 Threaded Rods (D) extend through the 2 holes on the Canopy (F). Secure the Canopy (F) by turning the Knurled Nuts (G) onto the exposed threaded portion of Threaded Rods (D) clockwise until tight.

2. Insert the specified light bulb into the Socket (I). DO NOT EXCEED THE SPECIFIED WATTAGE.

Insert the Shade (H) opening into the Canopy (F) aligning 3 protrusions from inner of the Canopy (F) with the threaded channel on the Shade (H) and rotate the Shade (H) in clockwise direction until the protrusions are tightly wedged against the threaded channel.
To Make the Wire Connections:

1. Gently pull the wiring from the junction box and allow wires to hang. The HOT or LIVE wire is usually black. The NEUTRAL wire is usually white. Check to see if there is a ground wire that is usually green or green with a yellow stripe or exposed copper metal wire. If needed, use a pair of wire strippers to remove about 1/2 inch of insulation from each wire.

2. Carefully inspect the fixtures wires. The NEUTRAL FIXTURE WIRE is White. The HOT FIXTURE WIRE is Black. The BARE COPPER WIRE is the GROUND WIRE. If you have any doubt and cannot identify the power-supply wires with confidence, then we recommend that you ask an electrician and that you not continue with the installation.

3. With the help of another person to hold the weight of the fixture, attach the fixture wires to the junction box wires as shown in the illustrations.

**NOTE:**
IT IS IMPERATIVE THAT THE JUNCTION BOX IN YOUR HOME BE PROPERLY GROUNDED!
DO NOT REVERSE THE HOT AND NEUTRAL CONNECTIONS OR SAFETY WILL BE COMPROMISED.

4. Check the wiring connections and if all looks good, gently tuck the wire connections neatly into the junction box.

**Care instructions:**
- Wipe clean with a soft, dry cloth or static duster.
- Always avoid the use of harsh chemicals or abrasive cleaners as they may cause damage to the fixture’s finish.
Attention:

- Do not position this light fixture where it may become covered by other flammable materials.
