! Tools required:
! Do not throw away packaging materials until assembly is complete.
! Assemble this item on a soft surface, such as cardboard or carpet, to protect finish.
! Proper assembly of this item requires 2 people.

Hardware

A  cam bolt  4x

C  wood dowel  8x

E  spring washer  12x

G  short “L” bracket  2x

I  short bolt  12x

B  cam lock  4x

D  long bolt  12x

F  flat washer  12x

H  long “L” bracket  2x
1. Flip the desk top over onto a clean smooth surface. Pull the drawers out until they stop.
2. Insert cam bolts (A) and wood dowels (C) into leg assemblies as shown. Insert cam locks into rails as shown in the drawing, making sure to line up the indicator mark points toward the end of the rail. Next align the leg assemblies to the side of the side of the desk and attach using long bolt (D), spring washer (E), and flat washer (F). Tighten with allen key.

NOTE: The top rail has 2 more holes than the bottom rail.
3. Place the short “L” brackets and long “L” brackets into the locations shown in the drawing. Insert short bolt (I) into each hole and tighten with supplied allen key. Be sure not to overtighten. With the help of another person flip the desk upright. Adjustable levelers are installed in the legs to accommodate uneven flooring. To adjust these levelers simply turn them counterclockwise to raise the leg.

CARE INSTRUCTIONS

Hardware may loosen overtime. Periodically check that all connections are tight. Wipe with a soft, dry cloth. To protect finish, avoid the use of chemicals and household cleaners.
